

About InstantAtlas™ Server

- Release: InstantAtlas™ Server v6.6.0

GeoWise is a specialist in delivering web based statistical and geographic reporting solutions often termed Local Intelligence Systems. Its products, including InstantAtlas, are being used by a large number of organisations in the UK and internationally. They target areas such as area profiling, performance reporting, visual data exploration and interactive publishing and presentation. Market sectors include government research & intelligence, performance management, social deprivation, crime and community safety, and public health. More information is available at www.instantatlas.com.
