Summary of differences: Tolson PCN

CLiK summary

Across 52 indicators, Tolson PCN was one of the best three PCNs for 11 indicators and one of the worst three PCNs for 29 indicators. Tolson PCN had the second highest number of CLiK indicators which were worse than the Kirklees average. Across PCNs, people in this locality were the most likely to disagree that people in their local area pull together and also most likely to disagree that their local area is a place where people trust each other. Tolson PCN has the highest proportion of people who said they do not feel safe in their local area after dark and the lowest proportion of people registered with a dentist. Satisfaction with the local area was the lowest in Tolson Care PCN, and people were the least likely to use green spaces weekly.

People in this PCN were more likely to walk for travel and have intentions to quit smoking compared to Kirklees overall. People were also more likely to be qualified to level 2 and less likely to be overweight compared to Kirklees overall.

CLiK: Long-term health conditions

Tolson Care PCN had the highest proportion of people reporting anxiety or depression compared to other PCNs. Rates of sciatica/lumbago/backache, asthma and dermatological related conditions were also higher in this locality compared to Kirklees overall.

Residents were less likely to report conditions including high blood pressure, diabetes, menopause and long COVID compared to Kirklees overall.

CLiK indicators where the PCN was in the best third (top 3) or worst third (bottom 3) of Kirklees PCNs

Best third

Tenancy *	17.4%
No active travel: walking	10.0%
Intentions to quit smoking	7.8%
Prescription medicines	6.2%
Qualified to Level 2	5.5%
Overweight (any)	4.5%
Drink alcohol in excess	3.0%
Working	2.1%
Have a long-term condition	2.1%
No active travel: cycling	1.8%
Concerned about alcohol consumption	1.6%

Note: Values are differences in percentage points to the Kirklees average. Positive values are better than average (i.e. higher for positive indicators and lower for negative indicators); negative values are worse than average (i.e. lower for positive indicators and higher for negative indicators)

Worst third

Pull together	-15.0%
