# Summary of differences: The Valleys PCN

## **CLiK summary**

Across 52 indicators, The Valleys PCN was one of the best three PCNs for 33 indicators and one of the worst three PCNs for 4 indicators. Across PCNs, The Valleys had the second highest number of CLiK indicators which were better than the Kirklees average. People in this locality were the most likely to say that people pull together in their local area, and were the most likely to say their area is a place where people trust each other. People were also much more likely to meet the weekly recommended amount of physical activity per week and use green spaces more frequently compared to Kirklees overall. People in The Valleys PCN reported higher household income and were more likely to be qualified to level 2 compared to Kirklees overall.

Across PCNs, the highest proportion of residents who drink alcohol in excess (i.e., 15 or more units a week) live in this PCN.

## **CLiK: Long-term health conditions**

Sciatica/lumbago/backache was the third most reported LTC where more residents reported this condition compared to the Kirklees average. There were also higher rates of asthma, menopause and long-term pain in The Valleys PCN compared to Kirklees overall. Residents in this locality were less likely to report having diabetes and/or high blood pressure compared to Kirklees overall.

# Summary of differences: The Valleys PCN

CLiK indicators where the PCN was in the best third (top 3) or worst third (bottom 3) of Kirklees PCNs

## Best third

Pull together	29.1%
Community trust	24.3%
Child poverty	24.2%
Feel safe after dark	18.1%
Meet physical activity guidelines	17.7%
Use green space weekly	16.7%
Satisfied with local area	16.0%
Household income	14.5%
Received benefits	13.5%
Qualified to Level 2	11.2%
Managing financially	11.0%
5+ fruit and veg	9.9%
Feel safe during the day	8.6%
Volunteered in last 12 months	8.3%
Obese	8.2%
Home suitable for needs	7.6%
3+ prescription medicines	7.1%
Overcrowding	6.9%

## Best third

Overweight (any)	6.7%
Experienced discrimination (any)	6.7%
Discrimination: ethnicity	6.2%
Eat Fast food at least once a week	5.8%
Registered with a dentist	5.6%
Disability	4.1%
Bad physical health	2.7%
Smoker	2.3%
Support to live in own home	2.3%
Vape daily	2.2%
No internet access at home	2.1%
Have help if needed	1.7%
Dependent on others	1.1%
Registered with GP	0.7%
Always lonely	0.7%

## Worst third

Tenancy *	-10.4%
Drink alcohol in excess	-7.5%
Mental wellbeing: high	-1.6%
Fallen in last year	-1.1%

Note: Values are differences in percentage points to the Kirklees average. Positive values are better than average (i.e. higher for positive indicators and lower for negative indicators); negative values are worse than average (i.e. lower for positive indicators and higher for negative indicators)

\*Tenancy (rented accommodation) is here treated as a positive indicator
